

## Scientific Session Pre-Recording Instructions for Oral Abstract Presentations

### Pre-Recorded Presentations Due Wednesday, September 20

If you are presenting during a Scientific Session and you are NOT attending the ASTMH 2023 Annual Meeting in person in Chicago, Illinois, follow these instructions to prepare your pre-recorded presentation.

#### **Table of Contents**

■ Session Structure .....	Page 1
■ Pre-Recording a Presentation Using Zoom.....	Page 1
■ Speaker Presentation Portal and Presenter Registration .....	Page 3
■ Structure for the Question and Answer Period.....	Page 3
■ Your Pre-Recorded Presentation and On-Demand Access.....	Page 3
■ Best Practices for Audio-Recording Your Presentation .....	Page 4

#### **Session Structure**

- Each oral abstract is allotted a 10-minute presentation (pre-recorded) timeframe. This time limit will be strictly enforced and our audio-visual staff will end each presentation after 10 minutes.
- After your pre-recorded abstract presentation is played it will be made available for On-Demand viewing.

#### **Pre-Recording a Presentation Using Zoom**

- Pre-recorded presentations must be submitted as an **.mp4 file** (video file) to the Speaker Presentation Portal by **Wednesday, September 20**.
- **Important: If you do not submit a pre-recorded presentation by Wednesday, September 20, we assume you will make an in-person presentation at the Hyatt Regency Chicago in Chicago, Illinois.**

- [Click here](#) to view an instructional video for recording your presentation with Zoom software.

- Sign up for a free Zoom account at [www.zoom.us](http://www.zoom.us)
- Click RESOURCES in the upper right corner and select Download Zoom Client
- Click Download to Download Zoom Client for Meetings

- Start a Zoom meeting (no need to invite anyone)
- Share your screen and select your presentation.
  - This will allow for the presentation to appear full screen with a picture of you or your camera shot in the upper right corner.
- Click Record
- Give presentation
- End Zoom meeting once presentation is complete
- The **.mp4 file** will be available on your computer shortly after you finish the Zoom meeting.

- Should I record one slide at a time?

When recording with Zoom, if you stop the recording in the middle of the presentation, you will have to re-record your presentation from the beginning. You should approach recording your presentation the same way you approach a presentation during a live meeting and record the entire presentation at once.

- The first slide of each presentation must include the following information:
  - Your abstract title. This title should match exactly to the abstract title that was entered into the abstract submission site.
  - Your first name and last name

- Refer to page 4 for best practices to use when recording your presentation.

- If you need technical support when recording your presentation on Zoom:

Step One: Use this link to view the resources on the Zoom Help Center  
<https://support.zoom.us/hc/en-us>

Step Two: If your questions are more technical and require a specialist, send an email to the audio-visual staff at [support@e-attend.com](mailto:support@e-attend.com). When communicating with the audio-visual staff, indicate that you are a Scientific Session abstract presenter for the ASTMH Annual Meeting and provide as many details as possible in your message.

## **Speaker Presentation Portal and Presenter Registration**

- During the week of September 11, you will receive an email with instructions and link to upload your pre-recorded presentation to the Speaker Presentation Portal.
  - The instructions and link will be sent to the email address provided for the presenting author during the abstract submission process. Incorrect email addresses provided during the abstract submission process could result in delayed or undeliverable notifications.
- You must register for the Annual Meeting in order to upload a pre-recorded presentation to the Speaker Presentation Portal. A Registration Order Number will be required during the upload process in order to submit a pre-recorded presentation. Your Registration Order Number can be found in the confirmation letter that you receive once you register.
- Register for the Annual Meeting here:  
<https://www.astmh.org/annual-meeting/registration>

## **Structure for the Question and Answer Period**

- If you do not attend the meeting in person, you cannot participate in the Question and Answer Period.
- Following each pre-recorded presentation, the in-person audience will have the opportunity to discuss the presentation, recognizing that the presenter of the pre-recorded presentation will not participate in this Question and Answer Period.
- All Scientific Sessions will subsequently be made available for On-Demand viewing within three weeks, including a recording of the Question and Answer Period.

## **Your Pre-Recorded Presentation and On-Demand Access**

- By submitting an abstract, the presenter has given permission to ASTMH to include a video/audio-recording of the abstract presentation in an On-Demand (MP4 recording) webcast.
- After the session, all abstract presentations will be available for On-Demand access within three weeks. **Important Note: Attendees who register for the Livestream Portal registration option will have On-Demand access to Livestream sessions only. On-Demand presentations for In-Person-Only Sessions can be accessed for a fee.**
- After the Annual Meeting, presenters for In-Person-Only sessions will be granted special access to view an On-Demand recording of your session. This will include access to all presentations within your session. Details about the availability of the On-Demand recording of your session will be available after the Annual Meeting.

- Registered attendees will have On-Demand access to the 2023 Annual Meeting presentations through October 1, 2024. Access to On-Demand recordings will differ for in-person registration and Livestream Portal registration.

### **Best Practices for Video-Recording Your Presentation**

- Use a computer with a built-in camera and microphone. Mobile phones and tablets are not recommended.
- The computer must have audio speakers and the presenter must know how to adjust the volume.
- A well-lit quiet space is best. Avoid dark rooms or noisy backgrounds, i.e. barking dogs, television, etc.
- Use a solid internet connection capable of streaming video. A hard-wired Internet connection is strongly preferred for reliability.
- When using a web cam, arrange for a close-up web camera shot of the presenter. We want to avoid a camera shot of an empty room with one person.
- When possible, frame the video to capture the top of your chest to the top of your head, with very little space above the head. Try to center yourself in the screen when facing the computer camera.
- The speaker should face the primary light source available in the room. If there is light coming through a window in the room, try to face the window.
- If possible, avoid a background with a blank wall. The use of a textured background or visual props results in a more dynamic presentation, as long as it is not more brightly lit than the speaker.
- Avoid the use of “good morning” or “good afternoon” when recording your presentation.
