Annual dates	January - March		July of each year	
Duration of course	3 Months (Online Modules: Modules 1 and 4 are each 4 weeks; In-person Modules: Module 2 is 2 weeks, Module 3 is 1 week, and Lab is 1 week)		4 weeks didactic weeks plus 1 clinical year (minimum) working in a resource limited country.	
Tuition	Tuition domestic learners \$8,458; international learners \$8,974; discounted fees available for employees of Baylor College of Medicine and Texas Medical Center affiliated institutions.		No tuition; course in intended for BIPAI's Texas Children's Global Health Corps and the Baylor College of Medicine, Department of Pediatrics Global Health Residents.	
Approximate living expenses per month	\$2,200 - \$2,600		\$0; Living expenses are paid for the Texas Children's Global Health Corps	
Additional academic degrees or credit offered	Certificate of Completion		None offered, Category I Continuing Medical Education hours are accrued	
Brief course description	The Diploma in Tropical Medicine (DTM) is offered in a modular format comprised of four intensive modules and a lab practical. Students can take all modules in the same year or enroll in fewer modules per year. However, to earn the DTM, all four modules and the lab practical must be successfully completed within 36 months. Completion of this program will prepare health care professionals to sit for the American Society of Tropical Medicine and Hygiene (ASTMH) Certificate of Knowledge in Clinical Tropical Medicine and Travelers' Health (CTropMed®) Exam.		This course will be administered annually to a unique group of physicians: those accepting international employment within BIPAI's Texas Children's Global Health Corps and those accepted into the Baylor College of Medicine, Department of Pediatrics Global Health Residency program. The four-week didactic course will closely mimic the examination outline and the seven major content areas specified by the ASTMH. Faculty for the course will be comprised of highly-trained and experienced physicians and teachers with international experience. Our intensive course will put a particularly heavy emphasis on the management of Pediatric HIV/AIDS in resource limited settings. This course will be followed by ongoing, in-country field experience. Physicians working at one of our centers will be able to network electronically with one another and with Houston based faculty for purposes of consultation on difficult cases and ongoing mentorship.	
Overseas opportunities for clinical time, if available	None		Yes, required in a BIPAI program	
Associated overseas sites			Angola, Botswana, Colombia, Lesotho, Malawi, Papua New Guinea, Swaziland, Tanzania, or Uganda

Approximate living expenses per month	1,500 EUR		Housing \$400-\$900/month; living \$300-\$600/month	
Additional academic degrees or credit offered	Diploma in Tropical Medicine plus 540 CME points		Diploma CME Credit Graduate Credit Hours	
Brief course description	<p>The objective of the Diploma Course is to train physicians to be able to work in countries of the tropics or subtropics. The course is also intended to enable participants to diagnose and treat diseases in travellers and migrants from the tropics and subtropics and to provide preventive medical travel-related advice.</p> <p>The focus of the course is on the aetiology, epidemiology, clinical presentation, diagnosis and treatment of tropical diseases and clinical work in low resource settings. The curriculum also covers travel medicine and principles of global health.</p> <p>Curriculum: The course teaches the following knowledge and skills:</p> <ul style="list-style-type: none"> • Epidemiology, diagnosis and treatment of tropical and travel associated diseases including bacterial, viral, mycotic and parasitic infections and venomous animal accidents. • Medical advice before travel and foreign assignments including prophylactic measures. • Principles of public health in low and middle income countries. • Principles of occupational health for travellers with long term stays • Indications, proper sample collection and handling for laboratory examinations and classification of the results in the respective clinical profile. • Microscopic detection of protozoa, worms and parasites. 		<p>Given in Lima, Peru, this unique tropical medicine training initiative combines an international faculty with didactic and formal bedside teaching right in the tropics. Intensive diploma course in English with 380 contact hours: 160 formal lecture hours, plus diagnostic laboratory, daily ward rounds on a 36-bed tropical disease unit or daily out-patient clinic, and case conferences. Two 4-day teaching trips to field clinics in the Andes and Amazon. Scholarships are available to those who are both nationals and residents of a Latin American Country. Course language is English.</p>	
Overseas opportunities for clinical time, if available	Several cooperations with institutions overseas exists. Opportunities for clinical time, if available: can be discussed in the course.		Yes. Graduates of this course will receive 3 weeks credit towards the clinical overseas requirement towards the ASTMH Certificate of Knowledge in Clinical Tropical Medicine and Travelers' Health	
Associated overseas sites	<ul style="list-style-type: none"> • Kumasi Center for Collaborative Research, Ghana • Centre de Recherches Médicales de Lambaréné, Gabon • Irrua Specialist Teaching Hospital, Nigeria 		Instituto de Medicina Tropical, Universidad Peruana Cayetano Heredia, Lima, Peru

Annual dates	September to December (core course), April (advanced modules)	July - August
Duration of course	13 weeks core course plus 3 weeks for advanced modules in Clinical Management of Tropical Diseases and Parasitology in International Health	4 weeks
Tuition	6.093,75 EUR	The full-time tuition rate is charged at a rate of \$1,197 per credit *. This rate does not apply to students taking courses for non-credit. The non-credit tuition rate is \$599 per credit *. Tuition does not include room and board. (* Fee's valid for 2020/2021 academic year and are subject to change)
Approximate living expenses per month	1,000	\$2,000 per J-1 visa recommendations
Additional academic degrees or credit offered	Master of Science in International Health	If taken for credit, participants will receive a document of completion for each module successfully passed, with a grade above the C average for the University. If participants take the modules for non-credit, they will receive a document of participation for each module and are not considered for any of the University's certificate programs for transcript and crediting requirements.
Brief course description	Our programme raises awareness of global health concerns and allows students to identify and analyse key factors shaping the health and well-being of populations. As a multidisciplinary approach it combines public health, epidemiology, tropical medicine, economics and management sciences, among others. The course is concerned with topics such as health promotion and prevention, treatment of poverty-related diseases, rehabilitation, strengthening health systems and informing health policy. The Diploma consists of a 13 week Core Course plus two advanced modules: Parasitology in International Health and Clinical Management of Tropical Diseases.	The Summer Institute in Tropical Medicine and Public Health is designed to provide training in key topics in tropical medicine and related public health issues through a multidisciplinary approach. It is also designed to prepare participants to work on current and emerging health problems in developing countries and the health problems of travelers. The curriculum contains current concepts and breakthrough research related to some of the most important tropical diseases today, and a host of expert lecturers present the most up-to-date findings on their work in these topics; Module I: Tuberculosis, HIV and Other Chronic Infections in the Tropics (223.685) Module II: Vector Borne Diseases in the Tropics (223.688) Module III: Intestinal Infections in the Tropics (223.688) Module IV: Child and Public Health In the Tropics (223.686)
Overseas opportunities for clinical time, if available	Not for clinical time, but students of the Master programme can choose advanced modules at universities that are part of the international tropEd network.	Yes, site research for various topics and with the course directors
Associated overseas sites	http://www.troped.org/	Peru and Bolivia

Annual dates	Sept & Feb each year	London based: October - December
Duration of course	3 months	3 months
Tuition	GBP £6,000	London based: GBP £6350
Approximate living expenses per month	GBP £700	GBP £6,970.00
Additional academic degrees or credit offered	MSc Tropical & Infectious Diseases, MSc Tropical Pediatrics, MSc Biology & Control of Parasites and Disease Vectors, MSc Molecular Biology of Parasites & Disease Vectors, MSc International Public Health, MSc Humanitarian Studies, PhD. LSTM also have a full range of CPD courses available from 3 days to 4 weeks duration.	MSc programme/DRPH programme/PhD/Short Courses & CPD
Brief course description	The Liverpool School of Tropical Medicine is the oldest school of tropical medicine in the world, and still at the forefront of research and education today with a research portfolio in excess of £210 million. This 13 week well-established programme, which is over 118 years old, gives an excellent grounding in tropical medicine and public health for low resource settings. Practical teaching of diagnostic parasitology and vector biology is strong and all teaching is by faculty with extensive experience of working in low resource settings. Students come from a wide variety of international backgrounds and their expertise is shared in a friendly atmosphere. Students range in experience from newly qualified doctors who have completed foundation training to vastly experienced physicians who have decided to spend part of their retirement working in the field. Students use the programme as a springboard into careers in many fields including international and humanitarian health, infectious disease and travel medicine.	The Diploma in Tropical Medicine & Hygiene (DTM&H) is an intensive, three-month, full-time course in tropical medicine and public health for physicians. The course aims to teach doctors the skills required to understand, diagnose, treat and prevent diseases that are especially prevalent in tropical and developing countries where resources may be limited. The course has a strong epidemiological base but the scientific basis of infectious diseases is also given priority. A particular feature of the course is the diversity of students who attend. Among the 70 students who take the diploma course each year, more than 25 different countries are usually represented. Students range in experience from recently qualified doctors (though usually no earlier than 3 years post-graduation) to specialist infectious disease physicians and surgeons with many years of experience working in tropical and developing countries. The course is continually updated in response to changing needs, new developments in knowledge and technology, and student feedback. It has remained highly popular with students throughout its history which spans over 100 years.
Overseas opportunities for clinical time, if available	No. MSc students are encouraged to fulfil an overseas research project for their dissertation. DTM&H students generally work for NGO's after the course and to facilitate this, LSTM hold an NGO forum where many NGO's are invited into LSTM to meet the students and give information on their recruitment processes.	
Associated overseas sites		None

Additional academic degrees or credit offered	The credits of the Postgraduate Certificate in Tropical Medicine and International Health are recognized for The Master of Science in Tropical Medicine (MTM).			Master of Public Health & Trop Med (MPH&TM); MSPH; PhD	
Brief course description	<p>This postgraduate certificate programme consists of three short courses:</p> <p>Research Approaches in International Health (one month, Sept, English only) This is an introductory course to research approaches in international health. It covers different research disciplines, including epidemiology and statistics, social sciences, and implementation research. It prepares the participant to recognise, appraise and use a variety of health research methods, both quantitative and qualitative.</p> <p>Challenges in International Health (three months: Oct- Dec English, March-June French) This 12-week course will provide the participant with a good understanding of the complex picture of health challenges globally in general and in deprived, vulnerable settings in particular.</p> <p>Tropical Medicine and Clinical Decision Making (three months, Jan-March, English only) This part focuses on descriptive pathology, laboratory practices and clinical decision-making adapted to low-resource settings and tropical district hospitals. This specialised clinical course is primarily designed for medical doctors who have no or little professional experience in (low-resource) tropical settings, as well as for clinicians working or planning to work in non-tropical settings with travelers and migrants.</p> <p>It is possible to follow parts of the Postgraduate certificate programme in Tropical Medicine and International Health:</p> <ul style="list-style-type: none"> • The Postgraduate certificate programme "Advanced Tropical Medicine and Challenges in International Health" combining the courses "Challenges in International Health" with the course "Tropical Medicine and Clinical Decision Making" • The course "Tropical Medicine and Clinical Decision Making" as stand-alone course. 			<p>The Diploma Course program prepares health professionals with clinical backgrounds to manage important public health problems in the tropics. This program prepares physicians and other health professionals in the epidemiologic, laboratory and clinical aspects of tropical diseases. It also prepares participants in the concepts and strategies essential to disease prevention and control programs. Students have opportunities to interact with faculty active in clinical/laboratory/field research. In addition to courses that focus on clinical management and control of diseases prevalent in the tropics, the program includes didactic classes and hands-on lab experiences in practical diagnostic parasitology and other microbiology.</p>	
Overseas opportunities for clinical time, if available	None			Yes	
Associated overseas sites	None			Peru, Colombia, Haiti, India, Malaysia, Indonesia, Mali, Guinea, other parts of Africa

Duration of course	13 weeks	9 months
Tuition	No tuition for U.S. Military & Public Health Service. \$1,500 for other federal employees. \$5,000 for civilian students. Foreign military: See MASL Course Number P175038	Total tuition and fees for 2020-2021 are as follows: Resident \$16,700 Nonresident \$34,750
Approximate living expenses per month	See Federal Per Diem rates. No central funding available.	\$1,000-\$1,500
Additional academic degrees or credit offered	Masters of Public Health and Tropical Medicine (MPH&TM), MPH with Tropical Public Health concentration, DrPH. Foreign Military: see MASL Course Numbers P175033, P175034, P175030	MS in Tropical Medicine PhD in Tropical Medicine
Brief course description	This intense and comprehensive training course is designed for physicians, nurse practitioners, and physician assistants who seek to improve their practice of clinical tropical medicine, travel medicine, and public health in austere, complex, and tropical environments. Faculty with substantial tropical medicine field experience conduct comprehensive lectures, seminars, laboratories, and case-based learning activities. Graduates of the course receive a certificate in Training in Tropical Medicine and Travelers' Health and masters level credits.	The Graduate Certificate Program provides comprehensive coverage of the principles of tropical medicine and global public health while stressing the importance of an integrated approach to tropical infectious diseases. All of the individual courses that make up this ASTMH Diploma Course are graduate-level courses offered at the university.
Overseas opportunities for clinical time, if available	Yes for active duty military. Assistance can be provided in arranging overseas experiences for other government personnel.	Elective rotations for the 4th year medical students are available.
Associated overseas sites	Thailand, Peru, Tanzania, Liberia, Honduras, India.	Federated States of Micronesia, Commonwealth of the Northern Mariana Islands, Republic of the Marshall Islands, American Samoa, Palau, Guam and Thailand

Annual dates	Online portions of the course are continuous and self-paced. The In-Person Course takes place in May annually, the Asian Clinical Tropical Medicine (ACTM) Course in even years, and the East African Tropical Medicine Course in odd years. Participants may take either the in-person course, the ACTM, or the EACTM course to meet the ASTMH Diploma Course requirements.		January-February	
Duration of course	Course completion requires completion of the seven online courses(self-paced) PLUS two weeks of hands-on training which may be done either in May in Minnesota, with the ACTM course, or the EACTM course.		6 weeks	
Tuition	Full price (for practicing providers): \$795 per online course. Complete Package price of \$7,550 includes all seven online modules PLUS two weeks of the In-Person course in Minnesota. Discounts available for trainees, retirees, military, and persons from developing countries. Prices are subject to change.		N/A	
Approximate living expenses per month	Minneapolis, MN (moderately priced metropolitan city): ~\$500/week; ACTM course is in Bangkok, Thailand: ~\$500/week.		N/A	
Additional academic degrees or credit offered	Certificate of Completion offered. CME and CE credits. Medical school and Graduate level credits may be available. Contact globalhealth@umn.edu for details.		N/A	
Brief course description	Hybrid online and in-person course. Completion requires seven online courses (25-35 hours each) PLUS two in-person weeks. This course has a unique focus on migrant/refugee health, health disparities, disaster response, noncommunicable disease, practical clinical care in low-resource settings, in addition to traditional tropical and travel medicine. The online portion is self-paced, and completion prior to the in-person portion is encouraged. The annual Minnesota course in May is experiential (interactive cases/exercises, laboratory, patient simulations, ultrasound, disaster management, and "global is local" field trips). The ACTM course in Thailand focuses on tropical diseases of Asia and includes patient contact, laboratory and field trips. The EACTM course in Uganda focuses on emerging infections and refugee health. The European Course in Tropical Medicine (ECTM), a TropEd partner site, in Brescia, Italy, focuses on migrant health and laboratory tropical medicine. These courses are offered every 1 to 2 years pending enrollment.		Course is currently only offered to UTMB Medical students, UTMB Residents, and UTMB Fellows as part of a larger Global Health Track offering. The entire global health track must be completed in order to sit for the ASTMH exam.	
Overseas opportunities for clinical time, if available	ACTM course (based in Bangkok, Thailand with optional extension to Cambodia; EACTM course (based in Kampala, Uganda); ECTM course (based in Brescia, Italy) - see website		UTMB Students, Residents, and Fellows may rotate at UTMB overseas field sites for additional elective credit.	
Associated overseas sites	For U of MN residents only: Costa Rica, India, Tanzania, Thailand, Uganda, Cameroon, and Bolivia.		Peru, Kenya, Uganda, Dominican Republic

Annual dates	The course takes place over two years, concurrent with resident years 2 and 3.	2023 Course is ongoing 2024 Online course will begin June 10, 2024 (Modules 1, 2 and 4); Module 3 (Parasitology) given live over ZOOM from July 8 through July 12, 2024
Duration of course	Four 2-week courses (Tropical Medicine, Global Health Policy and Practice, Refugees and Vulnerable Populations, Microbiology Lab), weekly Infectious Disease conference, monthly International Rounds, monthly telemedicine case conference with our colleagues in Mbarara, Uganda.	2024 On-line course will begin June 10, 2024 and participants will have two years to complete
Tuition	The course is free for residents at fellows at UVA. At this time it isn't open to anyone other than UVA trainees.	Physicians: \$1,600 per module, or \$6,000 for all four modules. Physicians working overseas (NGOs), Residency/Fellowship Programs, Nurses, Clinical Nurse Practitioners, and Physician Assistants: \$1,400 per module, or \$5,000 for all four modules. Developing Countries (Physicians, Residents, Fellows), and Military: \$700 per module, or \$2,500 for all four modules. Medical Students: No fee for WVU Health Profession Students; \$150 per module or \$500 for all four modules for in-state non-WVU Health Profession Students; \$300 per module or \$1,000 for all four modules for out-of-state Health Profession Students.
Approximate living expenses per month	N/A	\$600.00 - \$1,500.00
Additional academic degrees or credit offered	Global Health Leadership Track certificate	AMA PRA Category 1 Credits for Physicians and Physician Assistants. Contact Hours for Nurses. Certificates of Completion of course modules also given.
Brief course description	This course is only open to UVA residents in the Global Health Leadership Track and to Infectious Disease fellows. The course includes two 2-week didactic courses (Tropical Medicine and Global Health Policy and Practice), one 2-week rotation with refugee and vulnerable populations and a 2-week laboratory experience. A monthly lecture series on International Health, a weekly Infectious Disease lecture series, and a monthly telemedicine case conference with our colleagues in Uganda extend over two years. Trainees are required to complete either the two didactic courses or the Fellows Conference Series and then can choose from among the other course components.	This course is designed to provide training in tropical medicine and global public health issues through a multidisciplinary approach to disease. Traveler's health is covered in detail as well. The course is divided into four modules: Module 1 - Introduction to Global Public Health; Module 2 - Clinical Practice in the Tropics and Traveler's Health; Module 3 - (Lab component) is virtual and given live over Zoom from July 8 through July 12, 2024; and Module 4 - Infectious Diseases. Modules 1,2,3, and 4 are offered online with a required virtual lab component (July 8 - July 12, 2024.) Participants who take Modules 1, 2, 3, and 4 will have two years to complete the coursework. Participants may take one or more modules in a given year and in any order. Lectures, laboratory components and detailed case studies will examine specific tropical diseases and stress diagnosis, treatment, and implementation of preventive and control measures. In addition to Parasitology, Module 3 also contains simulations in Ultrasound, Neonatal Resuscitation, and Peds Procedural Pearls. All elements of ASTMH curriculum are covered, as well as practical aspects of providing quality health care in resource-limited settings.
